

Touring Tray and Canopy Packages

**The Ultimate offroad touring package,
100% Australian Made and built to go where you want,
when you want.**

Our package starts with the solid base of our Camp King trays

All our trays come with premium inclusions as standard – no hidden extra costs! Our trays have been engineer certified by a mechanical engineer and they are all hand made by qualified tradesmen.

Our trays are made from aluminium so they are light weight and will be durable against all environmental elements. All our trays are fully welded units, they are not just riveted together.

Tray pricing includes all of the below:

- Premium powdercoat finish as standard (ebony sahara black).
- 2 large underbody boxes (dual size) or 4 underbody boxes (RAM size).
- A large rear trundle drawer as standard (sizes are model dependant).
- Unique Camp King fully engineered headboard
- Australian Made 65L poly water tank underneath, with a plumbed filler and tap.
- Our trays come with a sheeted base also as standard.
- Premium integrated vented fuel filler which is fitted into the headboard with rerouted fuel lines.
- We use high quality LED auto lamp lights to finish.

From Australian Made componentry to Australian Made canvas we choose and use only the best quality products designed to handle our harsh conditions so you can get off the beaten track with peace of mind.

The Touring canopy built to suit your individual requirements

All our canopies are TIG welded for maximum weld integrity and strength. We use a 50 x 50 x 3mm frame which is unlike anything on the market.

Canopy inclusions are listed below:

- Mechanically engineered base frame – certified to hold over 600kgs up top!
- Our canopies come with fully framed floors (eg. a flush floor, no drop down) which ensures that you get the most out of the floor space.
- Our canopies come with a double seamed roof which ensures no weld tear out when exposed to rough corrugated roads
- A double return on our doors for maximum strength.
- Our canopy price includes a powdercoat finish in a standard colour. We only use high quality scratch resistant powder. We only use the highest quality seals to ensure maximum protection (dust proof and water proof)
- Our canopies come standard with square lift off provisions (legs can be purchased from us if you like).
- All our canopies come with a unique Camp King top extrusion rail as standard,
- And they all come with high quality electronic door locks as standard (not commissioned).

Compliment your tray and canopy build with our

CAMP KING 270 DEGREE FREE STANDING AWNING

The Camp King Protector Series 270 Awning is the first in a range of freestanding awnings designed to make travel simple. Providing almost instant shelter, set up simply requires unzipping, a short walk and a quick clip in and it is good to go – no poles needed!

Offers massive shade with fast setup

The best 270 degree awning on the market!

Bundle with our world famous **ROOF TOP TENT**

A superior quality tent with a quick and easy set up and pack down unit, completely convenient for your overlanding adventures! Ready to camp within 1.5 minutes resulting in a very convenient overlanding camping experience.

What others have to say...

We can say a lot of great things about our products, but we tend to find that it is most effective for others to do the talking for us. Camp King is endorsed by some of Australia's and the world's most well-known overlanders and adventures. On top of that our products have been displayed on builds that have won numerous awards at SEMA (the largest automotive show in the world).

"I couldn't be happier with my canopy from Camp King Industries. Being a photographer who spends a lot of time in our great outback and remote regions, I needed a canopy of the highest quality, that not only suited my very specific requirements, but was also fully sealed to keep the bulldust and water out. The result: A canopy that perfectly suits my needs, built to the highest of quality that I am proud to have on the back of my ute. If you want a canopy that will surpass all of your expectations, see the team at Camp King Industries. You will not be disappointed."

Matt Williams - Iconic Australian Photographer

"It was an absolute pleasure working with Camp King Industries with my Ultimate Amarak and Amarak Crew Car. They made an incredibly complex project really easy and came up with several brilliant and innovative ideas along the way.

The quality of the Camp King product and team, led by Sarah and Lucas, is outstanding. They are experts in their field and make superb quality, long-lasting products. As campers and four-wheel drivers themselves, they understand what their customers need, and they deliver it. And on top of that, their trays, rooftop tents and canopies look damn awesome too! They are beautifully finished, and it's all done right here in Australia. I can recommend Camp King Industries if you're after a quality rooftop tent, tray, tub-topper or full custom canopy like me."
